

## Bobbing Along

It has been almost two years since we issued our last news letter.

Stuart & Georgina have now been running Adcutech since November 2007 and the last three years have not been an easy ride. We are happy to say we have managed to keep our heads above water and are still here.

Thanks to the continued support of our team & customers 2009/10 was a promising year which will enable us to grow the business.

In November 2009 Tony Hayter joined us after having moved up from Bournemouth. Tony is a skilled CNC Turner and is a valuable member of the Adcutech Team.

## Continuing Quality Focus

ADCUTECH have continued to work hard to fulfil the requirements that the ISO9001 and in April were awarded the ISO9001:2009 approval.

During 2009/10 ADCUTECH also successfully completed two external customer audits and are now preferred suppliers to major medical and defence companies.

ADCUTECH management and staff are committed to providing quality services and components and will continue to improve the management system to sustain ISO Certification.

## Getting Locked Up!

During 2010 ADCUTECH have been focussing some resources on a custodial line of business.

For a number of years ADCUTECH has been involved in manufacturing Police & Prison hatches for customers.

However, following direct contact from the Home Office, ADCUTECH are now working on an in-house design.

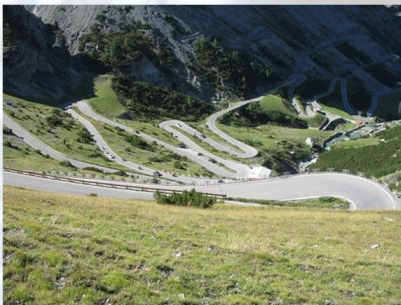

The prototype is nearing completion and will shortly be installed and tested in a Dorset Police Station.

It is hoped that the hatch will be in full production early 2011. With a dedicated assembly area we cannot wait to get started.

Nuns on the run” - Apparently it’s a long story

Stelvio Pass “- It’s a long way down

## CzechWrecks 2010

In August 2010 we had the pleasure to sponsor two likely lads who were taking part in CzechWrecks 2010 in aid of Cancer Research UK. The 4 day rally visits six countries: France, Switzerland, Italy, Germany, Austria and the Czech Republic.

The rally involved driving from Calais to Prague and back (3000 miles) in a car that must be at least 15 years old and originally cost £150 or less:

**They raised £1099.49p Well Done**

## Plans

ADCUTECH have continued to add to the company plant list. An addition to our inspection room is the Taylor Hobson Surtronic 3+ surface measuring unit. The Surtronic 3+ combines advanced technology with high precision and value to give effective measurement of surface finish.

We have also ordered a new High Speed Haas CNC Milling Centre which is being delivered mid February 2011.

The new Milling Centre features include:

- Improved contouring for greater accuracy and smooth finish.
- A full Renishaw probing system which will reduce set up time.
- Through Spindle Coolant which increases tool life, allows higher cutting speeds & clears chips during deep hole drilling and pocket milling
- 210mm full 4th axis rotary table

The Haas high performance Super Speed vertical milling centre provides high spindle speed, fast rapids & quick tool changes necessary for high volume production and reduced cycle times.

Workshop space has provisionally made, although a complete revamp is also planned for 2011.

## And Finally

ADCUTECH will be closed for Christmas from Friday 24 December 2010 to Tuesday 4 January 2011.

We would like to take this opportunity to wish all our customers a very Merry Christmas & a Happy New Year

Thank you for your continued support. We look forward to doing more business with you in 2011.
